

Passive Thermal Targets

Passive, no power zeroing and shooting targets for thermal sights, made from a unique thermal reflective material with a natural thermal signature, visible up to 2000 meters. Suitable for any weather, day and night for outdoor use, a cost effective solution for thermal training. Supplied with or without adhesive backing including repair patches for "hot" and "cold" zones.

Custom size, chart and silhouette.

Repairable and reusable.

Fit 3-5 micron and 8-12 micron thermal devices.

patent pending

Zeroing

Standard and custom Calibration & Zeroing. Weapon's Vehicle's sight zeroing. Long range thermal calibration targets. Multi spectral zeroing targets- Thermal, NVG and Laser.

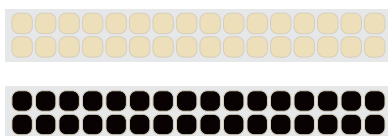

Figures

Figures and silhouettes for shooting range. Head, Half and Full Figures. E type targets. Reversed polarity silhouettes. Adhesive backing, repairable and reusable.

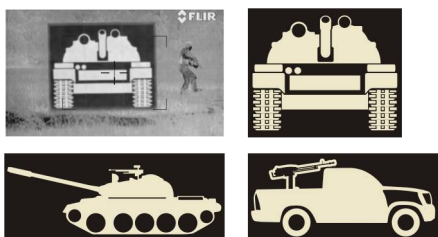

Sleeve targets

Targets with sleeve for SIT & MIT target systems. Target size: 50x100 cm (19x39"). Target can have custom silhouette and size. Can also be supplied with adhesive backing.

Repair patches

Adhesive backed repair stickers to prolong target use. Repair kits for "hot" and "cold" target zones.

Vehicles

Tanks, Jeeps and trucks silhouettes. T-55, T-72, Bradley, BMP, BDRM, Toyota and custom. Adhesive backing or plastic backing for easy deploy. All targets can be custom made by order.
